# SPORTYAK

Used as tenders for boats and for fishing, the Sportyak 213 and Sportyak 245 are more stable, more durable and lighter than the classical dinghies thanks to their particular hull and the technology used to make them. More than 100 000 BIC boats have so far been manufactured and they have become a standard feature in the yachting world. The Sportyak 213 and 245 are stable, strong, light and 100% recyclable at the end of their life-cycle.

**New rowlock made out of aluminum injection for 2020**
