POWER ON

SWISS DESIGN

SwissCat₃₁

THE MOMENT YOU GO FULL THROTTLE...

OUR SEMI-CATAMARAN HULL DESIGN

brings fuel-efficiency and speed, for the most versatile experience possible. This special design allows for a high loading capacity as well as a very stable hull in different conditions. The two keels give our boats that extra touch of Swiss precision - allowing you to easily follow the course, without the need for excessive steering. Tested with over 1600 NM on the sea, our 900 horsepower SwissCat-31 produced an average fuel consumption of 35 liters per hour at an average speed of 25 knots.

IT'S ALL IN THE DETAILS

We believe your next Swiss-Cat should be a reflection of your dreams and desires. There's something about the visible carbon fiber hardtop, dashboard, cockpit, back shells, as well as, the black high-gloss finish, the blue underwater lights, and luxurious black leather interior that make this Swiss-Cat 31 stand out in the waters.

On top of this, the Swiss-Cat-31 also boasts a spacious cabin and toilet. Of course, it is always your choice as to how you configure your desired Swiss-Cat.

Whether you're off on a family boat adventure, hopping between different islands or just dropping anchor at your favorite waterfront hangout, the Swiss-Cat 31 is designed to shine for you.

SWISS DESIGN

26 FEET OF PERFECTION

There's no shortage of possibilities in the Swiss-Cat-26. Being the small brother of the Swiss-Cat 31, here are just a few reasons to love the Swiss-Cat 26:

- Large sunbed in the aft with a big storage area underneath.
- A beautiful big flip up helm seat and a futuristic cockpit with an optional carbon fiber hardtop. Inside the cockpit is the option for a spacious toilet and shower.
- The front of the boat also boasts a big sunbed and possibility for a table.
- An optional sleeping cabin can be located underneath the sunbed folding up simply by the press of a button.
- Power possibility of up to 900Hp.
- Trailing your boat just got simplified, with its weight under 3500 kgs in total, including the trailer and a beam of 2.55m.

INFINITE COLOURS,
INFINITE POSSIBILITIES

SWISS CAT

SwissCat
